Brooktrout TR114+P16V-T1	✓	

WINport supports a wide range of modem types. Almost all Rockwell chipset and Hayes Compatible modems are also supported but it is still recommended to use a modem currently on the HCL. All modems on this HCL list are EXTERNAL only. Technical Support does not support nor recommend internal modems. The use of a standard 16550 UART com port or a supported Multi-port I/O board is also required with any modem when in use with FAXport/WINport products.

* Indicates issue in fax standard of modem hardware.

I/O Boards

Tested & Supported

Manufacturer	Model Name	Model Description	Windows 95 operating system	NT 4.0 operating system	Windows 2000* operating system
Control	RocketPort	ISA/PCI 4-port	✓	✓	
	RocketPort	ISA/PCI 8-port	✓	✓

Supported Software

WINport Software	FAXport Software
Carbon Copy 3.0a	Adobe Acrobat 2.x
HyperAccess (32 Bit)	Corel WordPerfect v6.0
Hyperterminal (32 Bit)	Corel WordPerfect Suite v7.0
Lotus Notes (4.x)	GoldMine 3.x
Microlink	Lotus Notes (4.x)
Microsoft Exchange 4.0/5.0	Maximizer 3.0, 97is
Microsoft Outlook 97, Microsoft Outlook 98	Microsoft Excel 6.0/7.0
Microsoft Windows Messaging	Microsoft Exchange 4.0/5.0
Netscape Navigator and Passport	Microsoft Internet Explorer
PcANYWHERE 4.0, 7.0, 7.5, 8.0	Microsoft Office 4.3 and up
ProComm Plus 2.x/3.0 (32 Bit)	Microsoft Outlook 97, Microsoft Outlook 98
QmodemPro (32 Bit)	Microsoft OfficeWorks
Quicklaw	Microsoft Schedule+
QuickLinkPro	Microsoft Windows Messaging
Reflections	Microsoft Word 6.0/7.0
Stac Reach Out	Netscape Navigator and Passport
Telix for Windows	Symantec Act! 2.0/3.0
Westlaw 6.0, 6.3	
Westmate 7.11	
WinComm Pro 7.0	

WINport on Windows 95/98 and Windows operates with TAPI compliant communications programs. WINport on Windows 3.x operates with communication program's which follow normal Windows communication driver routines. DOSport supports only Int-14 compliant communication programs. FAXport operates correctly with most Windows 95/98/NT and Window 3.x shell printable applications.

Topologies

- Token Ring — Able to use on the same or multiple segments.
- Ethernet — Able to use on the same or multiple segments. Able to use with Thinnet or Thicknet. Able to work with all protocols.
- Arcnet — Able to use on the same or multiple segments. Able to work with all protocols.

E-Mail Gateways

- MS Exchange 4.0, 5.0, 5.5
- Lotus Notes/Domino
- cc:Mail
- MAPI

Application Programming Interfaces (API) - FAXport Software

- DDE
- OLE
- SFAPI — Simple Fax API allows basic integration
- EFAPI — Extended Fax API allows advanced integration
